What Is Our Company About?

Unifour Medical Research is a part of a network of highly experienced clinical research professionals. Our research team is dedicated to providing you the highest level of service throughout your participation in a clinical trial. We partner with highly experienced physicians to provide a unique service to you and our community through:

- Educating people about clinical trials, the FDA approval process which allows or denies new drugs to become available by prescription, and the importance of clinical trial volunteers.
- Connecting individuals to clinical trials and giving them access to investigational products that may benefit others in the future.
- Monitoring the health and safety of each individual volunteer while participating in a clinical trial.
- Working together with pharmaceutical companies to collect information that may help others that have a specific medical condition.

Deciding whether to participate in a clinical trial is an important and very personal decision. We hope that this brochure and our staff will help guide you through this process. We look forward to providing you the information that you need to make an informed

decision about whether a clinical trial is right for you.

It's your choice.

What Is A Clinical Trial/Research Study?

- A clinical trial is a research study conducted to gain knowledge about investigational medications that may benefit future patients.
- Doctors perform clinical trials to see if investigational medications are safe and effective.
- Our doctors conduct tests according to strict guidelines set forth by the Food and Drug Administration (FDA).
- Research is not the same as treatment.

Why Should I Participate?

- Research development may help improve your health and the health of others.
- Qualified participants can receive study-related medical care from experienced doctors at no cost.
- You can be more proactive with your own healthcare.
- You can benefit from our knowledgeable, caring staff.
- It helps you learn about other medical options that are available to you.
- Financial compensation may be available to qualified participants.

Questions To Ask Before Participating

- What is the purpose of the trial?
- Is the study drug FDA approved for any other conditions?
- How should I discuss my participation with my personal doctor?
- Why do some research studies involve the use of a placebo (inactive product that looks like the study drug)?
- Can I take my regular medications while I'm in a study?
- Will the study cost me anything?
- What happens if I have a problem while I'm enrolled in a study?
- What if I decide that the study is no longer in my best interest?
- How can I get my family and friends involved in a research study?
